

### Remarks

#### Statement Under 37 CFR 1.111

Amendments to a number of claims are included in the response to the June 25 Advisory Action. 37 CFR 1.111 states in part that: *In amending in response to a rejection of claims in an application or patent undergoing reexamination, the Assignee or patent owner must clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. He or she must also show how the amendments avoid such references or objections.* The Assignee notes that this requirement is not relevant to the instant application because no documents or references that need to be avoided have been identified during the prosecution of this application. The Assignee is merely correcting clerical errors and canceling previously withdrawn claims to put the application in a form for allowance and issue.

#### Reservation of rights

The Assignee hereby explicitly reserves the right to present the previously modified and/or canceled claims for re-examination in their original format. The cancellation or modification of pending claims to put the instant application in a final form for allowance and issue should not to be construed as a surrender of subject matters covered by the original claims before their cancellation or modification.

#### Conclusion

The pending claims are of a form and scope for allowance. Prompt notification thereof is respectfully requested.

Respectfully submitted,  
Asset Trust, Inc.
